FIRST SUNDAY AT THE AIRPORT

For over 10 years, on the First Sunday of each month (weather permitting) aircraft of assorted vintages and types are displayed and the Museum hangars are open to the public. Stroll through the open hangars and our shuttle can to take you to different areas of the airport. Docents are also on hand for guided tours. Additional features of First Sundays are various car clubs and the EAA’s Young Eagle program that offers free plane rides for ages 8-17. The Museum’s gift tent sells T-shirts, hats and aviation related items with all proceeds going to the Museum.

Happy visitors and outstanding magazine articles have spread the news of First Sunday at Santa Paula Airport. Besides our amazing collection of local planes, pilots from all over Southern California and beyond are flying their airplanes in to be displayed, to visit and enjoy the day. Come see beautifully restored antique airplanes, small antique military planes, aerobatic planes and modern day experimental aircraft. You won’t be disappointed!

The Aviation Museum of Santa Paula goals are to create:
- Other Airport displays from 1930 forward.
- A hangar featuring WWII as well as the Korean and Vietnam wars.
- A Hollywood hangar depicting the many celebrities at the Airport over the years and the many movies filmed here.
- A Women in Aviation exhibit featuring the exceptional women based at Santa Paula since its beginning.
- Demonstrations of aerodynamics, design and construction of aircraft.

Other Airport displays from 1930 forward.
A hangar featuring WWII as well as the Korean and Vietnam wars.
A Hollywood hangar depicting the many celebrities at the Airport over the years and the many movies filmed here.
A Women in Aviation exhibit featuring the exceptional women based at Santa Paula since its beginning.
Demonstrations of aerodynamics, design and construction of aircraft.

Displays of renowned pilots’ personal histories, accomplishments and contributions to aviation.
A Link trainer, aviation library and video collection.
A children’s “hands-on” exhibit.
An Aviation Scholarship Fund endowing the future of our youth.

All of this will come true with your support. The Aviation Museum of Santa Paula, Inc. is a non-profit organization; all donations are tax-deductible and greatly appreciated.

After the St. Francis Dam disaster in 1928, local ranchers Ralph Dickenson and Dan Emmett decided some of the devastated area adjacent to the river would make a good location for an airport. They both had experience in ranch management and recognized that a single airport would greatly benefit everyone in the Santa Paula area.

Since the opening, Santa Paula Airport has been widely recognized around the world for its antique, classic and experimental aircraft as well as celebrated for its climate and its Friendship Group of aircraft. Many talented and famous pilots have flown in and out of Santa Paula Airport including Charles Lindbergh, Chuck Yeager, Bkeece Turner and Pancho Barnes to name a few.

Since the opening, Santa Paula Airport has been widely recognized around the world for its antique, classic and experimental aircraft as well as celebrated for its climate and its Friendship Group of aircraft. Many talented and famous pilots have flown in and out of Santa Paula Airport including Charles Lindbergh, Chuck Yeager, Bkeece Turner and Pancho Barnes to name a few.

With that, a great deal of aviation history has been made here, been well recorded, and is currently stored throughout the airport. Some of these artifacts date back to the initial idea of creating a "Santa Paula Airport".

"Welcome to the historic Santa Paula Airport. South of Highway 126 between Palm Ave. and 10th Street. Open First Sunday of the Month 10 a.m. to 3 p.m. or Group Tours by Appointment (805) 525-1109. www.amszp.org"

Welcome!

Aviation Museum of Santa Paula

"...To educate the public of all ages in aviation and its history, both in general, and as it relates to Santa Paula and Santa Barbara County. To inspire, motivate and challenge the younger generation to carry on the dreams of our aviation pioneers."
